

Modulhandbuch

zu der Prüfungsordnung

Studiengang Computer Simulation in Science mit dem Abschluss Master of Science

Ausgabedatum: 14.12.2020

Stand: 14.12.2020

Inhaltsverzeichnis

| | |
|--|----|
| Abschlussarbeit („Master-Thesis“) | 4 |
| <i>Computer Simulation</i> | |
| Computer Simulation 1 | 5 |
| Computer Simulation 2 | 8 |
| Computer Simulation 3 | 10 |
| <i>Computer Science</i> | |
| Computer Science 1 | 12 |
| Computer Science 2 | 14 |
| <i>Numerical Methods</i> | |
| Numerical Methods 1 | 16 |
| Numerical Methods 2a | 18 |
| Numerical Methods 2b | 20 |
| Numerical Methods 3 | 21 |
| <i>Atmospheric Physics</i> | |
| Atmospheric Physics 1 | 22 |
| Introduction to the Atmospheric Physics | 24 |
| Atmospheric Physics 2b | 25 |
| <i>Computational Electromagnetics</i> | |
| Computational Electromagnetics 1 | 27 |
| Computational Electromagnetics 2 | 28 |
| <i>Computational Finance</i> | |
| Computational Finance 1 | 29 |
| Computational Finance 2 | 30 |
| <i>Computational Fluid Mechanics</i> | |
| Computational Fluid Mechanics 1 | 31 |
| Computational Fluid Mechanics 2 | 33 |
| Computational Fluid Mechanics 3 | 34 |
| Computational Fluid Mechanics 4 | 35 |
| Computational Fluid Mechanics 5 | 36 |
| <i>Experimental Particle Physics</i> | |
| The Standard Model of Elementary Particle Physics | 37 |
| Cosmology and General Relativity | 38 |
| Foundations of Elementary Particle and Astroparticle Physics | 39 |
| Detector Physics | 40 |
| <i>Imaging in Medicine</i> | |

| | |
|---|----|
| Imaging 1 | 41 |
| Imaging 2 | 43 |
| Detector Physics | 45 |
| <i>Materials Science</i> | |
| Statistical Mechanics of Soft Matter | 46 |
| Numerical Methods for Physics of Soft Matter | 47 |
| <i>Theoretical Chemistry</i> | |
| Theoretical Chemistry 1 | 48 |
| Theoretical Chemistry 2 | 49 |
| <i>Theoretical Particle Physics</i> | |
| The Standard Model of Elementary Particle Physics | 50 |
| Many Particle Theory | 51 |
| Statistical Field Theory | 52 |
| Cosmology and General Relativity | 53 |
| Introduction to Quantum Field Theory | 54 |
| Advanced Quantum Mechanics | 55 |

| | | | | |
|---|--|--|--------------------------------|---------------------------|
| MT | Abschlussarbeit („Master-Thesis“) | PF/WP PF | Gewicht der Note 30 | Workload 30 LP |
| <p>Qualifikationsziele: Die in englischer Sprache zu verfassende Abschlussarbeit soll zeigen, dass die Kandidatin oder der Kandidat sein Fachgebiet beherrscht und in der Lage ist, innerhalb einer vorgegebenen Frist eine einschlägige Aufgabenstellung selbstständig zu bearbeiten. Das Thema der Masterarbeit wird mit Bezug zum Wahlfach gewählt. English Translation: The master thesis written in English has to prove that the candidate masters his field of study and that he/she is able to accomplish independently a task relevant to this field within a given time frame. The topic of the master thesis is chosen with reference to the specialization.</p> | | | | |
| Moduldauer: 1 Semester | | Angebotshäufigkeit: in jedem Semester | | Empfohlenes FS: 4 |

| Nachweise | Form | Dauer/ Umfang | Wiederholbarkeit | LP |
|---|---------------------------------|--------------------------|-------------------------|-----------|
| <p>Voraussetzung für die Modulabschlussprüfung: Voraussetzung für die Ausgabe des Themas der Abschlussarbeit ist der Nachweis von 70 LP sowie der Abschluss aller beschränkt wiederholbarer Modulprüfungen. English Translation: 70 credit points as well as the conclusion of all module examinations which can only be repeated a restricted number of times are required for getting the topic of the master thesis.</p> | | | | |
| Modulabschlussprüfung ID: 61066 | Abschlussarbeit (Thesis) | | 1 | 30 |
| <p>Erläuterung zur Modulabschlussprüfung: English Translation: master thesis, can be repeated once.</p> | | | | |

| CSim1 | Computer Simulation 1 | PF/WP PF | Gewicht der Note 11 | Workload 11 LP |
|---|--|--------------------------|-------------------------------|--------------------------|
| Qualifikationsziele: Mastering the fundamental mathematical concepts underlying the master program. Acquisition of basic knowledge of numerical algorithms and their applications in natural sciences and mathematics. Ability to write computer programs to implement the algorithms. The students are able to use this knowledge independently and apply it to solve projects in a laboratory course. | | | | |
| Moduldauer: 1 Semester | Angebotshäufigkeit: jedes 2. Semester | Empfohlenes FS: 1 | | |

| Nachweise | Form | Dauer/ Umfang | Wiederholbarkeit | LP |
|---|---------------------------------------|------------------|------------------|----|
| <p>Voraussetzung für die Modulabschlussprüfung: Die Anmeldung zur Modulabschlussprüfung kann erst erfolgen, wenn die UBL 46961, die UBL 46913 und die UBL 62507 erbracht wurden. English Translation: The registration to the final module exam is possible only when UBL 46961, UBL 46913 and UBL 62507 are successfully completed.</p> | | | | |
| <p>Zusammensetzung des Modulabschlusses: Die Form der Modulabschlussprüfung wird zu Beginn des Semesters bekannt gegeben, in dem die Modulabschlussprüfung stattfindet. English Translation: The type of the final module exam will be announced at the beginning of the lecture.</p> | | | | |
| Modulabschlussprüfung ID: 47033 | Schriftliche Prüfung (Klausur) | 180 Minuten | 2 | 5 |
| <p>Erläuterung zur Modulabschlussprüfung: English Translation: written module examination (180 minutes), can be repeated twice.</p> | | | | |
| Modulabschlussprüfung ID: 46893 | Elektronische Prüfung | 180 Minuten | 2 | 5 |
| <p>Erläuterung zur Modulabschlussprüfung: English Translation: Electronic module examination (180 minutes), can be repeated twice.</p> | | | | |
| <p>Organisation der Unbenoteten Studienleistung(en): Die UBL 46961 ist in Komponente a, die UBL 46913 ist in Komponente b und die UBL 62507 ist in Komponente c zu erbringen. English Translation: The UBL 46961 has to be fulfilled in component a, the UBL 46913 in component b and the UBL 62507 in component c.</p> | | | | |
| Unbenotete Studienleistung ID: 46961 | Form gemäß Erläuterung | | unbeschränkt | 2 |
| <p>Erläuterung: Unbenotete Übungen zu "Introduction to Computer Simulation", mindestens 50 Prozent der Übungspunkte sind Voraussetzung für die Anmeldung zur Modulabschlussprüfung. English Translation: Ungraded exercises for "Introduction to Computer Simulation", at least 50 per cent of the exercise points are required for the registration for the final module exam.</p> | | | | |
| Unbenotete Studienleistung ID: 46913 | Form gemäß Erläuterung | | unbeschränkt | 2 |
| <p>Erläuterung: Schriftliche Leistungsabfrage (ca. 60 Min.)</p> | | | | |
| Unbenotete Studienleistung ID: 62507 | Form gemäß Erläuterung | | unbeschränkt | 2 |
| <p>Erläuterung: Unbenotete Übung zu "Lab Course I", Upload von mindestens 10 Lösungen der Übungen ist Voraussetzung für die Anmeldung zur Modulabschlussprüfung. English translation: Ungraded exercises for "Lab Course I", upload of at least 10 solutions of the exercises is required for the registration for the final module exam.</p> | | | | |

| Komponente/n | | PF/WP | Lehrform | SWS | Aufwand |
|--|---|-------|---------------------|-----|---------|
| CSim1-a | Introduction to Computer Simulation | PF | Vorlesung/ Übung | 3 | 120 h |
| Inhalte: <ul style="list-style-type: none"> • MATLAB • Numerical precision and simple algorithms (e.g. finding zeros of a function) • Algorithms of linear algebra: linear systems of equations, eigenvalues • Initial value problems (Runge-Kutta-integration); application to Kepler-problems • Fourier transformation • Molecular dynamics • Numerical integration • Fitting of data | | | | | |
| CSim1-b | Block Course on Mathematical Foundations | PF | Vorlesung/ Übung | 1 | 60 h |
| Bemerkungen: Die Teilnahme an den Übungen ist freiwillig, aber dringend empfohlen. English Translation: The attendance at the exercises is optional but urgently recommended. | | | | | |
| Inhalte: <ul style="list-style-type: none"> • Differential and integral calculus (in several dimensions) • Matrix calculus | | | | | |
| CSim1-c | Lab Course I | PF | Übung | 4 | 150 h |
| Inhalte: Programming assignments to solve problems chosen from the topics: <ul style="list-style-type: none"> • Random number generators • Monte Carlo integration • Boundary value problems: iterative solution of the Laplace-equation; applications in electrostatics • Diffusion • Chaos • Percolation • Monte Carlo simulation of spin systems (2d Ising model, 2d XY model, ...) • Neural networks • Navier-Stokes equations • Finite elements method | | | | | |

| | | | | |
|--|--|---------------------|--------------------------------|---------------------------|
| CSim2 | Computer Simulation 2 | PF/WP PF | Gewicht der Note 13 | Workload 13 LP |
| <p>Qualifikationsziele: Acquisition of the mathematical concepts and practical methods of data analysis strongly based on practical examples. The students shall be enabled to autonomously solve basic problems in data analysis. The students learn mastering of the requirements for algorithms specific to high performance computing. They are able to develop complex parallel algorithms, to analyze them and judge their efficiency.</p> | | | | |
| <p>Allgemeine Bemerkungen: Knowledge of numerical mathematics and basic algorithms from Bachelor is assumed.</p> | | | | |
| Moduldauer: 1 Semester | Angebotshäufigkeit: jedes 2. Semester | | Empfohlenes FS: 2 | |

| Nachweise | Form | Dauer/ Umfang | Wiederholbarkeit | LP |
|---|-------------------------------------|--------------------------|-------------------------|-----------|
| Modulabschlussprüfung ID: 46939 | Sammelmappe mit Begutachtung | | unbeschränkt | 13 |
| <p>Erläuterung zur Modulabschlussprüfung: Komponente a): Data Analysis - Nachgewiesene LP: 5</p> <ul style="list-style-type: none"> • Bearbeitungen der wöchentlichen ausgegebenen Übungsaufgaben • Fachgespräch von 30 Minuten Dauer <p>Komponente b): Parallel Algorithms- Nachgewiesene LP: 8</p> <ul style="list-style-type: none"> • Bearbeitungen der wöchentlichen ausgegebenen Übungsaufgaben • Fachgespräch von 30 Minuten Dauer <p>English Translation: Component a): Data Analysis - Credit Points LP: 5</p> <ul style="list-style-type: none"> • Solution of weekly exercises • Oral discussion: length of 30 minutes <p>Component b): Parallel Algorithms - Credit Points LP: 8</p> <ul style="list-style-type: none"> • Solution of weekly exercises • Oral discussion: length 30 minutes | | | | |

| Komponente/n | | PF/WP | Lehrform | SWS | Aufwand |
|---|----------------------------|-------|---------------------|-----|---------|
| CSim2-a | Data Analysis | PF | Vorlesung | 4 | 150 h |
| Inhalte: Probability, important distributions and their properties, expectation values, RMS, correlation, error propagation, tests, parameter estimation, max. likelihood, least squares, fits, optimisation, confidence intervals, detector unfolding, special methods (Bootstrap, Jackknife), parameterisation, profile likelihood method, marginalisation of systematic uncertainties, multivariate techniques. | | | | | |
| CSim2-b | Parallel Algorithms | PF | Vorlesung/ Übung | 6 | 240 h |
| Inhalte: Parallel architectures and parallel programming models, speedup, efficiency, scalability, linear systems of equations, communication avoiding, sparse matrices and graphs, partitioning methods, iterative methods, colouring schemes, preconditioning using different methods (e.g., incomplete factorizations, domain decomposition and Schwarz iterative methods) | | | | | |

| | | | | |
|---|--|---------------------|--------------------------------|---------------------------|
| CSim3 | Computer Simulation 3 | PF/WP PF | Gewicht der Note 12 | Workload 12 LP |
| Qualifikationsziele: Mastering the fundamental mathematical concepts underlying the master program. Acquisition of basic knowledge of numerical algorithms and their applications in natural sciences and mathematics. Ability to write computer programs to implement the algorithms. The students are able to use this knowledge independently and apply it to solve projects in a laboratory course. | | | | |
| Allgemeine Bemerkungen: Knowledge of numerical mathematics and basic algorithms from bachelor are assumed. | | | | |
| Moduldauer: 1 Semester | Angebotshäufigkeit: jedes 2. Semester | | Empfohlenes FS: 3 | |

| Nachweise | Form | Dauer/ Umfang | Wiederholbarkeit | LP |
|--|---------------------------------------|--------------------------|-------------------------|-----------|
| Voraussetzung für die Modulabschlussprüfung: CSim1, Modern Programming (CS1) Die Anmeldung zur Modulabschlussprüfung kann erst erfolgen, wenn die UBL 47002 erbracht wurde. English Translation: The registration to the final module exam is possible only when UBL 47002 is successfully completed. | | | | |
| Zusammensetzung des Modulabschlusses: Die Form der Modulabschlussprüfung wird zu Beginn des Semesters bekannt gegeben, in dem die Modulabschlussprüfung stattfindet. English Translation: The type of the final module exam will be announced at the beginning of the lecture. | | | | |
| Modulabschlussprüfung ID: 46979 | Schriftliche Prüfung (Klausur) | 180 Minuten | 2 | 10 |
| Erläuterung zur Modulabschlussprüfung: English Translation: written module examination (180 minutes), can be repeated twice | | | | |
| Modulabschlussprüfung ID: 47028 | Elektronische Prüfung | 180 Minuten | 2 | 10 |
| Organisation der Unbenoteten Studienleistung(en): Die UBL 47002 ist in Komponente b zu erbringen. English Translation: The UBL 47002 has to be fulfilled in component b. | | | | |
| Unbenotete Studienleistung ID: 47002 | Form gemäß Erläuterung | | unbeschränkt | 2 |
| Erläuterung: Unbenotete Übungen zu Lab Course II (2 LP), mindestens 50% der Übungspunkte und 50% des Projektes sind Voraussetzung für die Anmeldung zur Modulabschlussprüfung. English Translation: ungraded exercises for Lab Course II (2 cr), at least 50% of the exercise points and 50% of the project are required for the registration for the final module exam. | | | | |

| Komponente/n | | PF/WP | Lehrform | SWS | Aufwand |
|--|---|-------|---------------------|-----|---------|
| CSim3-a | Introduction to Computer Simulation II | PF | Vorlesung | 2 | 120 h |
| Inhalte: Physical and mathematical problems will be discussed together with the parallel algorithms used to solve them: - Linear algebra (matrix product, Lanczos and CG algorithm and others) - Differential equations - Many-body problems - Monte Carlo simulation of statistical systems | | | | | |
| CSim3-b | Lab Course II | PF | Vorlesung/ Übung | 4 | 240 h |
| Inhalte: <ul style="list-style-type: none"> • MPI: Introduction • An application: numerical integration • Collective communication • Fox's algorithm for parallel matrix multiplication • Strong/weak scaling, Amdahl's law • OpenMP • Hybrid programming with MPI & OpenMP • Monte Carlo simulations of a scalar field • GPU Parallel Programming with CUDA • Project work: for example, Parallelizing the Poisson equation or Monte Carlo Simulation of a statistical system on a lattice (4d Ising model, q-state Potts models, 3d two-component scalar field theory) Other project topics can be many-body simulations (Lennard-Jones potential with systolic algorithm), time dependent Schrödinger equation, electromagnetic radiation, computational fluid flow, ... | | | | | |

| | | | | |
|--|--|---------------------|-------------------------------|--------------------------|
| CS1 | Computer Science 1 | PF/WP PF | Gewicht der Note 9 | Workload 9 LP |
| <p>Qualifikationsziele: Acquisition of knowledge to design and implement larger software projects using object-oriented methods. Students shall be enabled to either apply virtualization technologies in the context of GRID and cloud computing (for the choice Virtualization I) or to master the basic concepts of High Performance Computing (HPC) which are needed for using modern (super-)computers.</p> | | | | |
| <p>Allgemeine Bemerkungen: Knowledge of one programming language is assumed. Die Modulabschlussprüfung wird in Zusammenhang mit den Modulkomponenten a + b oder a + c abgenommen. English translation: The module final examination is taken in connection with the module components a + b or a + c.</p> | | | | |
| Moduldauer: 1 Semester | Angebotshäufigkeit: jedes 2. Semester | | Empfohlenes FS: 1 | |

| Nachweise | Form | Dauer/ Umfang | Wiederholbarkeit | LP |
|--|---------------------------------------|--------------------------|-------------------------|-----------|
| <p>Zusammensetzung des Modulabschlusses: Die Form der Modulabschlussprüfung wird zu Beginn des Semesters bekannt gegeben, in dem die Modulabschlussprüfung stattfindet. English Translation: The type of the final module exam will be announced at the beginning of the semester.</p> | | | | |
| Modulabschlussprüfung ID: 46901 | Schriftliche Prüfung (Klausur) | 120 Minuten | unbeschränkt | 9 |
| Modulabschlussprüfung ID: 46909 | Mündliche Prüfung | 30 Minuten | unbeschränkt | 9 |

| Komponente/n | | PF/WP | Lehrform | SWS | Aufwand |
|---|---|-------|---------------------|-----|---------|
| CS1-a | Modern Programming | PF | Vorlesung/ Übung | 4 | 180 h |
| Inhalte: Overview of software engineering, C++, debugging, Makefiles, design patterns, GUIs | | | | | |
| CS1-b | Virtualization I | WP | Vorlesung/ Übung | 3 | 90 h |
| Inhalte: Introduction to virtualization and its application in Science. Topics covered are general virtualization technologies like hypervisors, paravirtualization and Operating-system-level virtualization, containers as well as their usage in the context of scientific Grid and Cloud Computing. Hands-on training on a selected topic. | | | | | |
| CS1-c | Introduction to High Performance Computing (HPC) | WP | Vorlesung | 2 | 90 h |
| Inhalte: <ul style="list-style-type: none"> • History of HPC • Overview • Processor • Memory • Networks • Parallel computing • Performance • Numerical methods • Future computing • Repetition | | | | | |

| | | | | |
|--|--|---------------------|-------------------------------|--------------------------|
| CS2 | Computer Science 2 | PF/WP PF | Gewicht der Note 7 | Workload 7 LP |
| <p>Qualifikationsziele: Ability to use different tools for software engineering. Acquisition of the basics of image processing in general and image analysis of tomographic images in particular or ability to set up orchestration environments and apply them.</p> | | | | |
| <p>Allgemeine Bemerkungen: Knowledge of one programming language is assumed. Die Modulabschlussprüfung wird im Zusammenhang mit den Modulkomponenten a + b oder a + c abgenommen. English translation: The module final examination is taken in connection with the module components a + b or a + c.</p> | | | | |
| Moduldauer: 1 Semester | Angebotshäufigkeit: jedes 2. Semester | | Empfohlenes FS: 2 | |

| Nachweise | Form | Dauer/ Umfang | Wiederholbarkeit | LP |
|---|-------------------------------------|--------------------------|-------------------------|-----------|
| <p>Zusammensetzung des Modulabschlusses: Inhalt, Frist und Form der jeweiligen Einzelleistung wird zu Semesterbeginn vom Prüfungsausschuss durch Aushang bekannt gegeben. English Translation: Assessment of folder, contents, time and form of each single achievement will be announced at the beginning of the semester through notice from the examination board.</p> | | | | |
| Modulabschlussprüfung ID: 46941 | Sammelmappe mit Begutachtung | | unbeschränkt | 7 |

| Komponente/n | | PF/WP | Lehrform | SWS | Aufwand |
|--|--|-------|---------------------|-----|---------|
| CS2-a | Tools | PF | Vorlesung/ Übung | 2 | 90 h |
| Inhalte: Version control systems, computer algebra packages, script languages, unit testing, Fortran, combining different programming languages, profiling, numerical libraries, important data structures (trees, hash tables) | | | | | |
| IMG2-a | Image Processing and Data Visualization | WP | Vorlesung/ Übung | 3 | 120 h |
| Inhalte: <ul style="list-style-type: none"> • Introduction to the importance of modern image processing and data visualization techniques to brain imaging • Data types and structures (scalar, vector, volume data) • Transformation and filtering techniques to carve out specific image features • Image processing pipelines in a supercomputing environment • Impact of AI on image processing • Methods for brain data visualization | | | | | |
| CS2-c | Virtualization II | WP | Vorlesung/ Übung | 3 | 120 h |
| Bemerkungen: Alternative to be mandatory for students with specialization Imaging. | | | | | |
| Inhalte: Additional training on virtualization techniques including orchestration of containerized environments. Protocols in virtualized environments and their usage. Hands-On training with project. | | | | | |

| | | | | |
|---|--|---------------------|-------------------------------|--------------------------|
| NM1 | Numerical Methods 1 | PF/WP PF | Gewicht der Note 8 | Workload 8 LP |
| Qualifikationsziele: Acquisition of knowledge of complex algorithms for the numerical simulation of ordinary differential equations. Ability to analyze and classify them, apply them properly and develop them further. | | | | |
| Allgemeine Bemerkungen: Numerical Analysis at bachelor level. | | | | |
| Moduldauer: 1 Semester | Angebotshäufigkeit: jedes 2. Semester | | Empfohlenes FS: 1 | |

| Nachweise | Form | Dauer/ Umfang | Wiederholbarkeit | LP |
|--|---------------------------------------|--------------------------|-------------------------|-----------|
| Voraussetzung für die Modulabschlussprüfung: Die Anmeldung zur Modulabschlussprüfung kann erst erfolgen, wenn die UBL 47034 erbracht wurde. English translation: The registration to the final module exam is only possible when UBL 47034 is successfully completed. | | | | |
| Zusammensetzung des Modulabschlusses: Die Form der Modulabschlussprüfung wird zu Beginn der Veranstaltung bekannt gegeben. English Translation: The type of the final module exam will be announced at the beginning of the lecture. | | | | |
| Modulabschlussprüfung ID: 47012 | Schriftliche Prüfung (Klausur) | 120 Minuten | unbeschränkt | 6 |
| Erläuterung zur Modulabschlussprüfung: English Translation: written examination of Numerical Analysis and Simulation I, (120 min), unrestrictedly repeatable | | | | |
| Modulabschlussprüfung ID: 46891 | Mündliche Prüfung | 30 Minuten | unbeschränkt | 6 |
| Erläuterung zur Modulabschlussprüfung: English Translation: oral examination of Numerical Analysis and Simulation I (30 minutes), unrestrictedly repeatable. | | | | |
| Organisation der Unbenoteten Studienleistung(en): Die UBL 47034 ist in Komponente a zu erbringen. English translation: UBL 47034 has to be fulfilled in component a. | | | | |
| Unbenotete Studienleistung ID: 47034 | Form gemäß Erläuterung | | unbeschränkt | 2 |
| Erläuterung: Bearbeitung der wöchentlich ausgegebenen Übungsaufgaben, Voraussetzung für die Anmeldung zur Prüfung. English Translation: ungraded weekly exercises for Numerical Analysis and Simulation I, required for the registration for the exam. | | | | |

| Komponente/n | | PF/WP | Lehrform | SWS | Aufwand |
|--|--|-------|---------------------|-----|---------|
| NM1-a | Numerical Analysis and Simulation I | PF | Vorlesung/ Übung | 6 | 240 h |
| Inhalte: <ul style="list-style-type: none">• Ordinary Differential Equations (ODE) models in Science• Short synopsis on the theory of ODEs• One-Step methods and extrapolation methods• Multi-step methods• Numerical methods for stiff systems• Application-oriented models and schemes• Boundary Value Problems• Methods for Differential Algebraic Equations• Geometric integrators | | | | | |

| | | | | |
|--|--|---------------------|-------------------------------|--------------------------|
| NM2a | Numerical Methods 2a | PF/WP WP | Gewicht der Note 8 | Workload 8 LP |
| Qualifikationsziele: Acquisition of knowledge of complex algorithms for the numerical simulation of partial differential equations. Ability to analyze and classify them, apply them properly and develop them further. | | | | |
| Allgemeine Bemerkungen: Numerical Analysis at bachelor level. | | | | |
| Moduldauer: 1 Semester | Angebotshäufigkeit: jedes 2. Semester | | Empfohlenes FS: 2 | |

| Nachweise | Form | Dauer/ Umfang | Wiederholbarkeit | LP |
|--|---------------------------------------|--------------------------|-------------------------|-----------|
| Voraussetzung für die Modulabschlussprüfung: Die Anmeldung zur Modulabschlussprüfung kann erst erfolgen, wenn die UBL 46911 erbracht wurde. English translation: The registration to the final module exam is only possible when UBL 46911 is successfully completed. | | | | |
| Zusammensetzung des Modulabschlusses: Die Form der Modulabschlussprüfung wird zu Beginn der Veranstaltung bekannt gegeben. English Translation: The type of the final module exam will be announced at the beginning of the lecture. | | | | |
| Modulabschlussprüfung ID: 47024 | Schriftliche Prüfung (Klausur) | 120 Minuten | unbeschränkt | 6 |
| Erläuterung zur Modulabschlussprüfung: English Translation: written examination of Numerical Analysis and Simulation II (120 minutes), unrestrictedly repeatable. | | | | |
| Modulabschlussprüfung ID: 46948 | Mündliche Prüfung | 30 Minuten | unbeschränkt | 6 |
| Erläuterung zur Modulabschlussprüfung: English Translation: oral examination of Numerical Analysis and Simulation II (30 minutes), unrestrictedly repeatable. | | | | |
| Unbenotete Studienleistung ID: 46911 | Form gemäß Erläuterung | | unbeschränkt | 2 |
| Erläuterung: Bearbeitung der wöchentlich ausgegebenen Übungsaufgaben, Voraussetzung für die Anmeldung zur Prüfung. English Translation: Ungraded weekly exercises for Numerical Analysis and Simulation II, required for the registration for the exam. | | | | |

| Komponente/n | | PF/WP | Lehrform | SWS | Aufwand |
|--|---|-------|---------------------|-----|---------|
| NM2a-a | Numerical Analysis and Simulation II | PF | Vorlesung/ Übung | 6 | 240 h |
| <p>Inhalte:</p> <ul style="list-style-type: none"> • Classification and well-posedness of PDEs; basic principles: derivation and discretization of PDEs; elliptic problems (maximum principle and finite differences, variational formulation and Sobolev spaces, finite elements); numerical solutions of discretized problems • hyperbolic systems, especially conservation laws (weak formulation, theory of characteristics, entropy, conservative schemes) • parabolic problems (evolution equations, method of lines, Rothe-method and convergence) • mixed systems (models of heterogeneous systems, splitting schemes) • case studies | | | | | |

| | | | | |
|---|--|---------------------|-------------------------------|--------------------------|
| NM2b | Numerical Methods 2b | PF/WP WP | Gewicht der Note 8 | Workload 8 LP |
| Qualifikationsziele: Acquisition of knowledge of different numerical techniques to solve problems in classical field theory and quantum mechanics. The focus will be on the implementation on parallel computers. Students shall be enabled to implement the algorithms. Ability to prepare a documentation. | | | | |
| Allgemeine Bemerkungen: Quantum Mechanics at bachelor level. Particularly suited for students with Bachelor of Physics or Applied Science | | | | |
| Moduldauer: 1 Semester | Angebotshäufigkeit: jedes 2. Semester | | Empfohlenes FS: 2 | |

| Nachweise | Form | Dauer/ Umfang | Wiederholbarkeit | LP |
|--|--------------------------|--------------------------|-------------------------|-----------|
| Voraussetzung für die Modulabschlussprüfung: Die Anmeldung zur Modulabschlussprüfung kann erst erfolgen, wenn die UBL 47038 erbracht wurde. English translation: The registration to the final module exam is only possible when UBL 47038 is successfully completed. | | | | |
| Modulabschlussprüfung ID: 46999 | Mündliche Prüfung | 30 Minuten | unbeschränkt | 3 |
| Erläuterung zur Modulabschlussprüfung: English Translation: oral module examination (30 minutes), unrestrictedly repeatable. | | | | |
| Organisation der Unbenoteten Studienleistung(en): Die UBL 47038 ist in Komponente a zu erbringen. English translation: The UBL 47038 has to be fulfilled in component a. | | | | |
| Unbenotete Studienleistung ID: 47038 | Form gemäß Erläuterung | | unbeschränkt | 5 |
| Erläuterung: Unbenotete Übungsaufgaben und schriftliche Ausarbeitung zu Numerical Methods in Classical Field Theory and Quantum Mechanics (5 LP) sind Voraussetzung für die Anmeldung zur Modulabschlussprüfung. English Translation: Ungraded small homework and term paper for Numerical Methods in Classical Field Theory and Quantum Mechanics (5 cr), required for the registration for the final module exam. | | | | |

| Komponente/n | PF/WP | Lehrform | SWS | Aufwand | | |
|--|--------------|--|------------|---------------------|---|-------|
| NM2b-a | | Numerical Methods in Classical Field Theory and Quantum Mechanics | PF | Vorlesung/ Übung | 4 | 240 h |
| Inhalte: <ul style="list-style-type: none"> Hydrodynamics: direct simulation of Navier-Stokes for incompressible fluids, lattice-gas models Electrodynamics: time-dependent propagation of electromagnetic fields, Yee-Weilandt discretization Eigenvalue methods for electromagnetic cavities Non-equilibrium thermodynamics of many-body problems Quantum mechanics: time-dependent Schrödinger equation, quantum-spin dynamics for quantum computing, Feynman-Kac path integral | | | | | | |

| | | | | |
|---|--|---------------------|-------------------------------|--------------------------|
| NM3 | Numerical Methods 3 | PF/WP PF | Gewicht der Note 6 | Workload 6 LP |
| Qualifikationsziele: Mastering of basic concepts of Numerical Mathematics. Ability to analyze and develop basic schemes in Numerical Analysis of Linear and Nonlinear systems. | | | | |
| Moduldauer: 1 Semester | Angebotshäufigkeit: jedes 2. Semester | | Empfohlenes FS: 3 | |

| Nachweise | Form | Dauer/ Umfang | Wiederholbarkeit | LP |
|---|---------------------------------------|--------------------------|-------------------------|-----------|
| Zusammensetzung des Modulabschlusses: Die Form der Modulabschlussprüfung wird zu Beginn der Veranstaltung bekannt gegeben. English Translation: The type of the final module exam will be announced at the beginning of the lecture. | | | | |
| Modulabschlussprüfung ID: 35013 | Schriftliche Prüfung (Klausur) | 120 Minuten | unbeschränkt | 6 |
| Erläuterung zur Modulabschlussprüfung: English Translation: written module examination (120 minutes), unrestrictedly repeatable | | | | |
| Modulabschlussprüfung ID: 34994 | Mündliche Prüfung | 30 Minuten | unbeschränkt | 6 |
| Erläuterung zur Modulabschlussprüfung: English Translation: oral module examination (30 minutes), unrestrictedly repeatable. | | | | |

| Komponente/n | PF/WP | Lehrform | SWS | Aufwand |
|---|--------------|---------------------|------------|----------------|
| NM3-a | PF | Vorlesung/ Übung | 3 | 180 h |
| Inhalte: Direct and iterative methods for solving linear systems and eigenvalue and singular value problems. The methods are analyzed w.r.t. stability, convergence, and complexity. Their application in different contexts is discussed. | | | | |

| | | | | |
|--|--|--------------------------|-------------------------------|--------------------------|
| AtmP1 | Atmospheric Physics 1 | PF/WP PF | Gewicht der Note 8 | Workload 8 LP |
| <p>Qualifikationsziele: Acquisition of expertise and skills on specific topics of atmospheric physics, atmospheric chemistry, measurement techniques as well as numerical modelling. The Summer School on Chemistry and Dynamics of the Atmosphere is a one week course held at the Research Centre Jülich. Students shall be enabled to get to know the relation of atmospheric research to adjacent disciplines to get a broader insight in interdisciplinary scientific questions. They will become acquainted with state-of-the-art measurement techniques and their applications. Furthermore, this course offers the opportunity to intensively discuss with the leading scientists in the field, who are available throughout the course. After the course the students are able to summarize the basic concepts of atmospheric chemistry and physics and thoroughly report their experience.</p> | | | | |
| <p>Allgemeine Bemerkungen: Die Modulabschlussprüfung wird in Zusammenhang mit den Modulkomponenten a + b oder a + c abgenommen. English Translation: The module final examination is taken in connection with the module components a + b or a + c.</p> | | | | |
| Moduldauer: 1 Semester | Angebotshäufigkeit: jedes 2. Semester | Empfohlenes FS: 2 | | |

| Nachweise | Form | Dauer/ Umfang | Wiederholbarkeit | LP |
|--|-------------------------------------|--------------------------|-------------------------|-----------|
| <p>Zusammensetzung des Modulabschlusses: Inhalt, Frist und Form der jeweiligen Einzelleistung wird zu Semesterbeginn vom Prüfungsausschuss durch Aushang bekannt gegeben. English Translation: assessment of folder, unrestrictedly repeatable. Contents, time and form of each single achievement will be announced at the beginning of the semester through notice from the examination board.</p> | | | | |
| Modulabschlussprüfung ID: 46923 | Sammelmappe mit Begutachtung | | unbeschränkt | 8 |

| Komponente/n | | PF/WP | Lehrform | SWS | Aufwand |
|---|--------------------------------------|--------------|-----------------|------------|----------------|
| CFM3-a | Smooth Particle Hydrodynamics | PF | Vorlesung | 4 | 120 h |
| Inhalte: Many process steps in energy technology required for the processing of particulate solids as well as several flow phenomena in environmental sciences which are increasingly attributed to climate change like e.g. sediment transport simultaneously involve complex three-dimensional fluid and particulate flows. These flows are characterized by complex shaped sometimes even moving boundary surfaces and a distinct free-surface behavior. Computational modeling of these flow phenomena can help understand the fundamental processes involved, predict their technical and environmental effects and help improve design and energy efficiency of related machinery. Particle oriented methods such as smoothed particle hydrodynamics (SPH) in combination with discrete element methods (DEM) in contrast to continuum based methods offer the opportunity to be inherently capable of representing the complex free-surface behavior in these systems without relying on a mesh needed for spatial discretization of flow. The concurrent use of particle based methods such as SPH and DEM is still limited in energy technology as well as environmental sciences. Particle based methods allow to improve energy efficiency of processes involving particulate solids as well as to better understand and study particulate/fluid flows in environmental sciences. These flows are impacted by global energy usage as shown by many recent investigations (IPCC Fourth Assessment Report). This course is highly theoretical for engineers and towards research methodology in particular flows. | | | | | |

| | | | | |
|---|--|--|-------------------------------|--------------------------|
| CFM4 | Computational Fluid Mechanics 4 | PF/WP WP | Gewicht der Note 4 | Workload 4 LP |
| Qualifikationsziele: Based on theoretical knowledge of the hydrodynamics of flow the application of computational model can be applied. The problem can be described; a conceptual model can be developed and the problem can be converted into a computer model. The results of a numerical simulation can be interpreted and used for an engineering design. Knowledge of Programming Language C, Python or MatLab is assumed. | | | | |
| Moduldauer: 1 Semester | | Angebotshäufigkeit: jedes 2. Semester | | Empfohlenes FS: 3 |

| Nachweise | Form | Dauer/ Umfang | Wiederholbarkeit | LP |

|--|--------------------------------|--------------|---------------------|------------|----------------|
| CFM4-a | Free Surface Water Flow | PF | Vorlesung/ Übung | 2 | 120 h |
| Inhalte: Free surface flow is very often in hydraulic structures. The detection of the free surface is a highly non-linear flow problem and finally not very well understood. Therefore, in the first part of the course special applications of Navier-Stokes equation will be resumed and based on the Modul of Computational Fluid Dynamics (CFD) the techniques to solve the free surface problem will be put on focus. In the second part of the course the application of different model approaches will be discussed. One-, two- and three-dimensional models will be used and applied to real world problems, e.g. flood protection, water turbine or pump intake, and so on. The model approach will be compared in order to optimize both accuracy and stability as well as storage space and cpu time. Open source models and commercial codes will be used as it is and currently available. Data management, pre-and post-processing should be handled by interactive shells or self made codes (Python, MatLAB). | | | | | |

| | | | | |
|--|--|--------------------------|-------------------------------|--------------------------|
| CFM5 | Computational Fluid Mechanics 5 | PF/WP WP | Gewicht der Note 4 | Workload 4 LP |
| Qualifikationsziele: The students are able to develop the mathematical, physical and chemical understanding needed for the description of smoke and fire propagation and to conduct further literature research. The practical exercises enable them to assess the plausibility and validity of numerical fire solutions. They acquire the ability to use the software FDS (Fire Dynamics Simulator) practically and to analyze the simulation data in the context of scientific questions. Students can run computationally intensive simulations on the provided HPC system (High Performance Computing). | | | | |

| DET | Detector Physics | PF/WP WP | Gewicht der Note 8 | Workload 8 LP |
| Qualifikationsziele: The students master the physical principles and building blocks of particle accelerators. They are able to perform simple computations of linear ray optics. The students know how to describe the interaction of different forms of particle radiation with matter and they are able to connect this knowledge to techniques, methods and building blocks of modern detectors and experiments in particle and astro-particle physics. The students shall be enabled to discuss the opportunities and problems of different types of detectors. They know how to precisely explain the use and the interplay of detectors in large experiments. The students shall be enabled to learn independently new special topics of the Elementary- or Astro-particle physics related to detector physics and to make a presentation about them. They master modern presentation media. | | | | |
