Date 19.09.2025

**On the deadline of personal arrival of students to the University of Wuppertal for studies under
Computer Simulation in Science Master's Programme**

For whom it may concern.

Due to frequent requests from first-year students facing delays in obtaining German student visas at diplomatic missions of the Federal Republic of Germany abroad, and taking into account the experience of previous years, the School of Mathematics and Natural Sciences has decided to set a deadline by which enrolled students must arrive at the University of Wuppertal and begin their studies in the Computer Simulation in Science programme. Since the programme begins in October, **October 31st** has been set as the **latest possible date of arrival** for students. Otherwise, the student may be excluded from the programme or the start of their studies may be postponed for a year. This is because students arriving after 31 October miss an excessive number of teaching hours, which leads to unsatisfactory completion of the curriculum. In addition, please note that the school does not issue any documents such as a Late Arrival Letter.

Sincerely Yours,

Prof. Dr. Francesco Knechtli

Dean of the School of Mathematics and Natural Sciences,
Head of the CSiS Programme
